

Teacher “Sneak Peek Pass”

We invite educators and one guest to visit Thanksgiving Point free of charge to discover how you can help make the most of your school’s field trip. Explore the resources and experiences available for your class with fun, hands-on learning activities prior to your field trip visit. You must show your teacher ID card with a picture to the admission desk upon arrival.

Discover space and teach STEM concepts in a fun way!

For a short time we are offering two new educational experiences at Thanksgiving Point!

Solar System Educator Workshop: Do you teach about the Solar System? You are invited to attend a free workshop on Thursday, September 22nd from 6-8pm at the Museum of Ancient Life at Thanksgiving Point. Come view the 3D movie "Asteroid: Mission Extreme" and participate in a solar system activity that you can then bring back into your classroom. There will also be an opportunity to win a free field trip for your class to view the movie and participate in activities on a giant vinyl map of the solar system. To register for this workshop or for more information, email Kathy at krutland@thanksgivingpoint.org.

Solar System Giant Traveling Map: Looking for an out of this world experience for your school? During the month of November, Thanksgiving Point is offering an outreach program featuring a 26’x30’ map of the solar system. This brightly colored map has a variety of “feet-on” activities for all grade levels to explore. The map must be set-up in the gym or large room, and cannot be used outdoors. For the price of \$500, this experience includes a 40 minute staff facilitated activity with each class, up to 8 classes. To sign-up or for more information, contact Kathy at krutland@thanksgivingpoint.org.
